

## ALUMINUM BRIGHTENER HP

### General Characteristics:

Appearance:	Clear Colorless Liquid
Chemical Composition:	Acidic Cleaner
Viscosity:	20-40 cps (25°C, 1 atm)
Solubility in Water:	Readily Soluble
pH, 1% Solution:	2.4 + 0.5
Foaming Nature:	Low to Medium

### Application: \*

In pressure wash systems use 35 to 50 parts water to one part Aluminum Brightener HP. Dilution rate may be adjusted as needed for different cleaning needs. As Aluminum Brightener HP contains a rinse aid for easy removal, it is important to wash the object bottom to top in order to prevent streaking. After washing, applied area should be rinsed from the top down with either an alkaline rinse or large amounts of water to effectively reduce the strength of the cleaner. Applied area should not be allowed to dry in the sun before rinsing.

\*As conditions vary, all dosages and guidelines are merely suggested starting points; it is recommended the user determine the proper operating conditions for his/her system.

### Special Features:

- Contains Hydrofluoric and Phosphoric Acids
- Contains No Sulphuric Acid
- Contains No Ammonia
- Powerful Cleaner/Brightener
- Contains Rust Inhibitors
- Non-Flammable

### Used By:

- Specifically Formulated to Clean Aluminum
- Suitable for All Aluminum Surfaces
- Ideal for Pressure Washing

### Packaging:

1 Gallon	5 Gallon	15 Gallon
55 Gallon	275 Gallon	Bulk
