

ARROBRITE ALUMINUM BRIGHTENER NHF

General Characteristics:

Appearance:	Clear Colorless Liquid
Chemical Composition:	Acidic Cleaner
Ionic Nature:	Anionic / Nonionic
Solubility in Water:	Readily Soluble
pH, 1% Solution:	2.0 + 0.5
Foaming Nature:	Low to Medium

Application: *

In pressure wash systems use 50 to 100 parts water to one part Aluminum Brightener NHF. Dilution rate may be adjusted as needed for different cleaning needs. Because this product contains a rinse aid for easy removal, it is important to wash the object bottom to top in order to prevent streaking. After washing, applied area should be rinsed from the top down with either an alkaline rinse or large amounts of water to effectively reduce the strength of the cleaner. Applied area should not be allowed to dry in the sun before rinsing. As product is water-based, it should not be used at temperatures above 85°C (185°F) or below 5°C (40°F).

*Pressure Wash

*As conditions vary, all dosages and guidelines are merely suggested starting points; it is recommended the user determine the proper operating conditions for his/her system.

Special Features:

- Contains No Hydrofluoric Acids
- Safer to Use than Most Aluminum Brighteners
- Highly Effective Product
- Minimal Foam

Recommended Uses:

- Specifically Formulated to Clean Aluminum
- Suitable for All Aluminum Surfaces
- Ideal for Pressure Washing

Packaging:

1 Gallon 5 Gallon 15 Gallon
55 Gallon 275 Gallon Bulk
