

NON ACID ALUMINUM BRIGHTENER

General Characteristics:

Appearance:	Clear Orange Liquid
Chemical Composition:	Alkaline Cleaner
Solubility in Water:	Soluble
pH:	11.0 – 12.5
Foaming Nature:	High

Application: *

In pressure wash systems use 35 to 50 parts water to one part Non-Acid Aluminum Brightener. Applying heat can accelerate the brightening characteristics of this product. Dilution rate may be adjusted as needed for different cleaning needs. As ArroBrite Non-Acid Aluminum Brightener contains a rinse aid for easy removal, it is important to wash the object bottom to top in order to prevent streaking. Applied area should not be allowed to dry in the sun before rinsing.

* Pressure Wash

*As conditions vary, all dosages and guidelines are merely suggested starting points; it is recommended the user determine the proper operating conditions for his/her system.

Special Features:

- Brightens Without Dangerous Acids
- No Ammonia, Non-Flammable
