

BRASS CLEANER POWDER

ALKALINE METAL CLEANER

General Characteristics:

Appearance:	White Powder
Chemical Composition:	Alkaline Solid Powder
Ionic Nature:	Anionic/Nonionic
Solubility in Water:	Readily Dispersible
pH, 1% Solution:	12.1 ± 0.5
Foaming Nature:	Low

Application: *

Brass Cleaner Powder should be diluted with water for different cleaning strengths. For typical cleaning, use 4 – 12 ounces of Brass Cleaner Powder per gallon of water. Adjust concentration as necessary depending on the surface condition of the substrate. At the end of the cleaning process, applied area should be thoroughly rinsed with water. For best results, temperature of solution should range between 150°F and 190°F.

*As conditions vary, all dosages and guidelines are merely suggested starting points; it is recommended the user determine the proper operating conditions for his/her system.

Special Features:

- Cleans Brass Quickly and Safely
- Removes Rust and Corrosion
- Concentrated Powder Saves \$\$
- Also Available in Convenient Liquid Form

Recommended Uses:

- Specifically Designed for Cleaning Brass

Packaging:

1 Gallon 5 Gallon 15 Gallon
55 Gallon 275 Gallon Bulk
