Purple Raine is recommended for normal print-surface cleaning at dilutions of 4 oz. (one packet) with warm or hot water to make a five-gallon solution. Product can be concentrated for tough cleaning, if necessary, at double strength. Powder should be mixed thoroughly until dissolved. Application should be at room temperature by soaking or coating surface with Purple Raine solution, followed by thorough cold water rinse.

As conditions vary, all dosages and guidelines are merely suggested starting points; it is recommended the user determine the proper operating conditions for his/her system.
