

RENEW II SILICONE PROTECTANT

General Characteristics:

Appearance:	White Opaque Emulsion
Chemical Composition:	Silicone Emulsion
Ionic Nature:	Nonionic
Solubility in Water:	Readily Dispersible
pH, 1% solution:	6.8 ± .05
Foaming Nature:	NA

Application: *

Renew II Silicone Protectant should be used at full strength for optimal lubricity. It may be diluted with water as necessary, depending on the application. Renew II Silicone Protectant contains a preservative which is designed to inhibit bacterial growth for 6-9 months. As product is water-based, it should not be used at temperatures above 85°C (185°F) or below 5°C (40°F).

*As conditions may vary, all dosages and guidelines are merely suggested starting points. It is recommended the user determine the proper operating conditions for their system.

Special Features:
